

Every Approved Treatment Today is the Direct Result of Clinical Research.

WHO IS MARY CROWLEY CANCER RESEARCH?

A non-profit 501(c)3 cancer research center that conducts clinical trial testing of the newest cancer discoveries, operating in compliance with the Food and Drug Administration (FDA) guidelines for the past 20 years.

WHAT DOES MARY CROWLEY DO?

Mary Crowley works to find potentially curative treatments for cancer patients through clinical trial testing. Mary Crowley's patient-specific approach uniquely aligns an individual's cancer with the newest discoveries in *personalized* genomic and immune based therapies while moving science forward for patients worldwide.

WHY IS RESEARCH DIFFERENT AT MARY CROWLEY?

- Mary Crowley specializes in a *personalized* approach and operates within a narrow niche of the cancer research community.
- Highly trained staff conduct Phase I and Phase II clinical trial testing for cancer patients, matching trials to molecular information found within each patient.
- Physician investigators are exceptionally qualified to add to the growing understanding of what *drives* cancer and create innovative research applications that attack these *drivers*.
- The patient-centric focus brings the newest clinical trial options to patients at a rapid pace.

WHEN CAN RESEARCH IMPACT A CANCER PATIENT?

Anytime after initial cancer diagnosis, an investigational agent may be evaluated and possibly used in conjunction with standard treatment. For individuals who have failed all standard cancer treatments, a clinical trial offers access to the latest targeted therapies under investigation, with the goal of providing HOPE for extended survival. Patients who enroll on promising clinical trials may have access to therapies years prior to their approval by the FDA.

HOW ARE MARY CROWLEY DONATIONS USED?

100% of philanthropy goes directly to patients in need of a clinical trial. Donors may direct gifts to the general fund, research for a specific type of cancer, or to Mary Crowley's Benevolence Program, which provides financial assistance to patients who have demonstrated need.
